Individual therapy plan for		Knapek, Michael				03.05.2021
Treatments	number of therapies	therapies per week	note	indication	Medical fee (GOÄ) & factor	costs of single therapy
Blutentnahme nach Diagnostikplan	1					
<i>Bitte Arzt auswählen</i>						
Consultation	1	1x/Monat		Result review, sequentially anamnesis, Adjustment of the therapy-plan.	31, 804, 806, 861, 870 (8,1)	280 €
60 min.						
Additional time	1			Screening of medical results, establishing of a homoeopathic repertory, documentation, establishing of an therapy plan or expertise. Cost quotation per hour.	A85 (6,0)	280 €
at qualified practice staff of THERA Praxisklinik:						
Consultation with assistent to explain the prescribed therapies	1					free of cost

Heavy metal detoxification therapy / Chelation-therapy

During heavy metal detoxification / Chelation therapy, chelators are administered into the veins via infusion. These bind to heavy metals or more specifically calcium plaques and are excreted together through the urine.

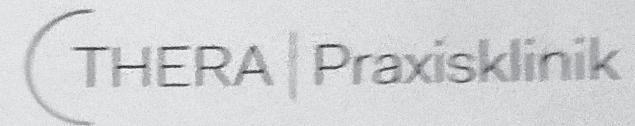

In order to guarantee the stability of the chelate complexes, ie to prevent a break-up of the connection between chelators and heavy metals in the body, the pH value in the urine must be at least 7.0. In contrast to the blood pH value, which is stable at 7.35-7.45, the urine pH value is very variable and is monitored before each discharge. If it is <7.0, you will receive an alkaline infusion solution for your protection, which reliably raises the urine pH value.

An infusion with various vitamins, minerals, amino acids and micro nutrients subsequently serves as antioxidant protection and increases ones tolerability.

Since chelators also have a high binding affinity with minerals such as calcium and potassium, you will receive a mineral infusion to prevent a deficiency in the days following your treatment.

Alkalic infusion

Individual therapy plan for

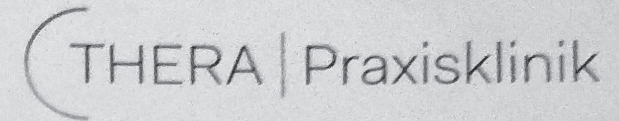

Knappek, Michael

03.05.2021

Treatments	number of therapies	therapies per week	note	indication	Medical fee (GOÄ) & factor	costs of single therapy
<i>Alkalic infusion before Heavy Metal Elimination / Chelation therapy obligatory, when urine-pH < 7.0:</i>						
sodium bicarbonate infusion 250ml				Alkalic infusion "NaBIKI"	272 (3,419)	49,95 € *
<i>Heavy metal detoxification / chelation therapy</i>						
1 A. DMPS				Elimination of heavy-metal pollution	272 (2,688), A287 (1,8)	70 €
1 A. CaNaEDTA				Elimination of heavy-metal pollution	A286 (3,5)	60 €
as infusion in 100ml NaCl	10	1				
DMSO infusion			BMI/Dosierung Auswahl		A286 (3,5)	60 €
In combination with the						
(me2.vie systemic therapy				Optimisation of efficiency of the chelation therapy	551 (1,8), A551 (1,8), A838 (2,258)	90 €)
<i>Vitamine / Mineral-infusion after heavy-metal elemintion / chelation therapy</i>						
<i>Antioxidant Infusion at the same day as heavy metal elemintion / chelation therapy:</i>						
250ml Prot.N opt-Infusion without Zinc	5	1			272 (5,171)	80 €
with Lymphdiaral, Solidago, Hepar comp						+4,59 €
with Glutathion						+12,37 €
<i>Mineral and vitamine Infusion in the days after a heavy metal elemintion / chelation therapy:</i>						
me2.vie combi-therapy incl. Mito Infusion, Glutathion 1200 mg, Vit. C 7,5 g	5	1		Mitochondrial activation & regeneration. Improves cellular uptake of infusions.	253 (2,3), A286 (4), 272 (7,433), 551 (1,8), A555 (1,8), A838 (2,258)	290 €

Within the me2.vie systemic therapy, current frequencies in milliampere range will be applied as alternating current (AC). In this way, the elemintion of heavy metals will be increased. Therefore, every heavy metal elemintion therapy should be combined with this method. This procedure should be alternated with the me2.vie combi-therapy to increase the tolerability and for facilitate a sucessfull switch between 1. reconstruction of the mitochondria and 2. elemintion of the toxic elements. Within the combi-therapy, high-dosed micronutrients will be infused as a "supply line", in contrast to the elemintion. Practically seen it's like: 1. treatment: Supply 2. treatment: elemintion.

Treatments	number of therapies	therapies per week	note	indication	Medical fee (GOÄ) & factor	costs of single therapy
<u>And that procedure in rotation.</u>						
<u>general therapies of the integrated medicine</u>						
Colon hydro therapy	6	1		Intestinal cleansing	56 (1,8), A268 (2,3), 533 (1,8), 699 (1,5), 770 (2,3), 3236 (2,3)	110 €

I have read the treatment plan and I agree with the treatments. About the therapy process and its alternatives I have been informed. I have to pay only therapies which have been conducted, unless i have not canceled an fixed appointment 24 hours before.

The financial report I accept regardless of the reimbursement by a private or public health insurance. Through further evaluation and treatment, the total cost can increase in addition to the treatments listed here.
